EDUCATION

St. Thomas' College of Engineering and Technology.

Bachelor of Technology in Artificial Intelligence and Machine Learning.

CGPA: 8.21

Oct. 2021 – June 2025

Shree Jain Vidyalaya

Higher Secondary

Marks : 80.2

June. 2018 – May 2020

EXPERIENCE

Programmer Analyst Trainee

COGNIZANT TECHNOLOGY SOLUTIONS

July 2025 – Present

Kolkata

- Completed full-stack development training at Cognizant, focused on building enterprise applications using Java, Spring Boot, React.js, and MySQL.
- Gaining hands-on experience in developing RESTful APIs, frontend components, and database integration following industry best practices.
- Working on practical assignments involving end-to-end application development, improving skills in backend logic, UI development, and deployment concepts.

Software Developer Intern

EDUTITAN VENTURE PRIVATE LIMITED

June 2024 – July 2024

Remote

- Designed and developed the user interface (UI) of a web application, ensuring an intuitive and engaging user experience.
- Implemented backend functionality using Express and Node.js, enabling robust server-side operations.
- Utilized MongoDB for database management, ensuring efficient data storage and retrieval.

PROJECTS

NomadCabs | *Java, SpringBoot, React, MySQL, MicroServices*

[Github](#)

- Developed Nomad Cabs, a cab management and booking platform that enables users to book rides with real-time availability and instant booking confirmation.
- Implemented core modules such as ride scheduling, driver assignment, booking management, and user-friendly dashboards for smooth cab operations.
- Built the system using Java Spring Boot (backend), React.js (frontend), and MySQL (database) with RESTful APIs to ensure secure and scalable performance.

HomeHub.com | *ReactJs, Tailwind Css, ExpressJs, MongoDB, Git*

[Github](#) | [Link](#)

- Developed HomeHub, a real estate web platform that allows buyers to explore and purchase homes while enabling sellers to list properties for sale through an easy-to-use interface.
- Implemented key features like property listings, detailed property pages, search/filter options, and user-friendly navigation to improve the overall home-buying experience.
- Built the application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with secure backend APIs for managing property data and user interactions efficiently.

Shortrix | *NextJs, Tailwind Css, ExpressJs, MongoDB, Aceternity UI, Git*

[Github](#) | [Link](#)

- Developed Shortrix, a URL shortening web application that converts long URLs into short, shareable links, making link management simple and efficient.
- Implemented features like user authentication, personalized dashboards, and URL history tracking, allowing users to securely manage and monitor their own shortened links
- Built the project using Node.js, Express.js, MongoDB, and Next.js, with REST APIs, JWT-based authentication, and database integration for reliable performance.

TECHNICAL SKILLS

Languages: Java , Javascript, TypeScript(Basic) HTML/CSS

DataBase: MySql , MongoDB

Frameworks: React, Node.js, SpringBoot, ExpressJs, Tailwind Css

Developer Tools: Git, Postman, VS Code, Visual Studio, IntelliJ, Eclipse
